Dear Sirs:

It is my understanding that a rule has been proposed that would require all stations to have a bandwidth of 4 KHZ.

I would like to take this means to register my objection to this proposed rule. If such a rule is passed it will cause a disastrous situation for many of the Civil Defense operations in the Storm Spotting area. The use of radios to maintain a network for storm spotting has a high priority in our county. Most of the radio would have to be replaced and this would cause financial problems beyond our ability to handle.

It also appears to me that the people with the most to gain are the people who manufacture radio equipment. I would suggest that they find other ways to promote the business.

Your consideration of my objection to this rule will be appreciated.

Sincerely,

  
Gerald Downing
